

# BOW VALLEY RESOURCE

Including Arrowwood, Milo, Queenstown, Shouldice and Mossleigh

Volume 4, No 52.

ARROWWOOD, ALTA., SEPT. 12, 1935

Subscription \$2.00, U.S.A. \$2

## Arrowwood Social Credit Study Group Notes

A Social Credit meeting was held in Arrowwood on Monday, Sept. 9th, and delegates to attend the nominating convention at Macleod were, Mr. E. Leveson to represent the local group and Mr. P. H. Coleman to represent the Buffalo Hill Group. Watch for the date of the next meeting to be held early in October.

## Brethren Church Notes

The Pastor will preach next Lord's Day at 11:30 on "Youth and the Church".

There are only three more Sundays in the Sunday School contest. Let us have every one present next Sunday.

The offering next Sunday morning will be for the Bethany Biblical Library.

Prayer service at 7:45.

Evening service at 8 o'clock. Come and enjoy this "Happy Hour" service with the many others who will be present.

The Sunday School teachers will be chosen on Sunday morning.

## For a Special Treat Serve

### Palm Ice Cream

Available in Assorted Flavors in Bricks or Bulk at the

### Arrowwood Bakery

## Reputation Counts

Throughout western Canada the reputation of United Grain Growers stands high.

That indicates that farmers have found satisfaction in dealing with this Company.

## Girl Guide and Brownie Notes

The Girl Guides, Brownies and Rangers held their annual meeting at the home of Mrs. Nixon on Sept. 6th at 2:30 p.m. All members of the Committee were present, also Mrs. Gooderham, District Commissioner. Owing to the busy season a small attendance of mothers, is reported. Mrs. Gooderham corrected our mode of handling monies. According to the Guide law, each leader handles their own monies as a separate bank account and should hand a report to the Sec.-Treas. at the end of each month. From now on it will be handled thusly. The secretary then gave a financial report which on motion by Mrs. Richards was accepted as read with no corrections. The yearly report will appear later.

Mrs. Gooderham was appointed as chairman for Presidential nomination.

Mrs. M. Ward nominated Mrs. Brown who withdrew. Mrs. Ward then nominated Mrs. Richards, seconded by Lord Garter. Also moved that Mrs. Coleman remain as Sec.-Treas.; and the committee of Mrs. H. Brown, Mrs. Lord and Mrs. W. Ward carried. Capt. Mrs. Ward presented Second Class badges to Lorna Richards, Iga Nixon and Shirley Ward. Mrs. Gooderham made the presentation of Sick Nurse badges to June Clifford, Mary Dunica, Annie Dunica, Loretta Weis and Dorothy Hesketh. This badge belongs to 1st class work. Mrs. Gooderham in a kindly address said she hoped each girl would feel the responsibility of this and remember the duty attached to it at home or abroad. Mrs.

## McGill Convocation

Representative leaders of Canadian religious, educational and business life take part in the ordinarily impressive ceremonies connected with the Convocation of McGill University. Of particular note is the presentation of the McGill Laws conferred upon His Eminence Cardinal Vilheneux. In the picture are shown from left to right: now in seminary: Right Rev. John C. MacLellan, D.D., Anglican Bishop of Guelph; His

Emmeline Cardinal Vilheneux, Archbishop of Quebec; A. J. Brown, K.C., Special Env. to梵蒂冈; Chancellor E. W. Beatty, K.C., LL.D., of McGill University, and President, Canadian Pacific Railway; Arthur G. Lortie, Principal of McGill University, and his wife; Rev. Mr. W. Ross. Rear row: W. A. Black, Hon. Vincent Massey and W. M. Birk. In the doorway is Mr. Hunter B. Drummond.

Wives then read reports from the other leaders. Ten girls have become 2nd class Guides, 6 have taken the Sick Nurse test. 4 Guides have left the company leaving 18 on the roll. Margaret Richards gave the Brownie report as Mrs. Hale the former leader has moved away. Margaret will carry on this work and will be succeeded by a new leader on a motion by Mrs. Ward after which the hostess served a delicious lunch.

Financial report  
Bal. on hand June 1 \$6.85  
Expenditure . . . . . \$3.65  
Bal. on hand Sept. 1 \$2.68  
Mrs. Tillie L. Coleman, Sec.-Tres.

## Classes Resumed

Mrs. P. H. Coleman of Arrowwood, teacher of Piano, Vocal, Theory, Harmony and Counterpoint has resumed all classes. Piano school classes in the Arrowwood School every Tuesday at 3:30 p.m. Pupils may enter at any period of the year.

List of successful pupils for 1935 Toronto Conservatory examinations.

Elementary Piano  
Norma Pinkerton pass.

Ivy Riches pass  
Primer Piano  
Intermediate pass  
Theory I  
Inez Shatto first class honors  
Dorothy Hesketh 1st class honors  
Ruth Northcott 1st class honors  
Orpha Thom honors  
Theory II  
Inez Shatto 1st class honors  
Dorothy Hesketh 1st class honors  
Ruth Northcott 1st class honors  
Orpha Thom honors  
Bruce Gillett pass  
Harmony I  
Alma Venisland honors

## LEADING PAINT MANUFACTURERS

### ANNOUNCE

## PRICE REDUCTION

### First Quality House Paint

Now \$3.95

per gallon

(Whites Slightly Higher)

The Quality Remains Exactly The Same. Only The Price Is Changed.

Dating from to-day, the price of first quality house paints manufactured and sold by the underlined companies is reduced to \$3.95 per gallon.

There has been a change in market conditions or manufacturing costs to justify this step. The test of quality is the same. The price reduction will make it possible for house-holders to obtain the highest quality paints at the lowest price consistent with strict maintenance of quality.

Thousands of people all over the country have been forced to put off much needed painting. Thousands more have been misled by "pargain" prices into using inferior paint of little or no value. We want to make it easier for you to enjoy the advantages of painting with first quality paint only, and are confident that the generous reduction in price now announced is the best way to accomplish this.

### THIS IS OUR CONTRIBUTION TOWARDS NATIONAL RECOVERY

## Social Creditors of Macleod Name Rev. E. C. Hansell

Rev. E. G. Hansell Vulcan, was nominated as Social Credit candidate for Macleod riding in the Federal election at the convention held at Macleod on Tuesday.

## The Country School Teacher

Letter in Toronto Globe  
This letter is of interest to parents living in the country, although I have no doubt some from the urban centres are making the same "mistakes". I refer to those who have been responsible for the school teachers in their sections, or who have made things so unpleasant that the teachers have resigned. The over-supply of teachers at present has made this condition of affairs too common among certain types of parents.

While the young teacher feels hurt at such treatment particularly when there is injustice, there is comfort in the fact that many a very successful teacher has trouble at some time in his or her career, and can live to smile at the petty ignorance of those parents who made the trouble.

For in nine cases out of ten it is the parents who are responsible if things do not go well in school. It may be that they cannot control two or three children at home, but recruit a teacher to look after from 20 to 40 divided into from seven to ten classes. Possibly they criticize the teacher in the hearing of the children, one of the worst mistakes they can make, for it invariably happens that if they destroy the child's confidence in the teacher the child loses respect for parents themselves. Perhaps they have trouble. Or, would you believe there have been cases where a parent, often a trustee, wants to hire a teacher who will board at his home.

I have heard of mothers who found fault because a teacher objected to the confusion caused by children asking to leave the room during the short periods, seldom more than an hour and a half in length, that they are in school. It should not be necessary to remind mothers that a warning to their little ones would remove this real nuisance in many schools. Also the country teacher often cannot enjoy the social life of the community because school children are present at every party when they should be home in bed, and every word and action of the teacher is under closest watch of parents or an older brother or sister, just a little jealous of the teacher's popularity.

In urban schools the teachers do not come in contact with critical pupils or parents after school hours, and no one complains of that. In one large city teachers have an hour and a half at noon, when they may go home for a hot dinner, and dismiss most of the children at 3:30. Also, after some years of experience which does not make them better teacher than the average country teacher with two or three years' successful experience, they receive a salary of \$2,600.

Some time after the depression started they received a 50 per cent cut, but in sum.

## TEA

### Nature Upsets Man's Plans

Harvest time in Western Canada has again arrived and for the next few weeks great activity, from early morning till late at night, will be the rule right across these western plains. Following several years of short crops, and in many sections complete failure of crops due to drought, and consequent lack of labor, the result on the part of tens of thousands of men to seed and harvest a crop, has been to add to the financial difficulties, banks, mortgage, loan and implement companies made provision whereby farmers were supplied with feed, fodder, seed, gas and oil, machinery repair, binder twine, and other essentials to the seeding and harvesting of a crop. Each individual farmer may not have received all that he desired, but, speaking broadly, the needs of the situation were met, well nigh to the limit.

Taking the country as a whole, and excepting certain more or less restricted areas, copious rains have fallen throughout the growing season, following a somewhat late sowing. Up to a few weeks ago prospects for at least a normal, if not above normal crop, were bright. Grasshoppers and cut worms, which were at first thought to have been the chief factor under control, were soon overtaken, prevailing before a minor factor to that end. Prospects for a fairly large and satisfactory crop were excellent, and estimates of as high as 100,000,000 to 140,000,000 bushels of wheat were commonly made.

But last month the bright picture became cloudy as rust made its appearance in the fields, coming on so suddenly and spreading rapidly western and northern. Governments, financial concerns, economic planners, farmers, every human agency is powerless against this development of Nature. For years technical agricultural experts, chemists and scientists employed by Governments have been seeking a means to offset the ravages of rust and to develop a strain of wheat that will be rust-resistant. But Nature this year has defied all their efforts, and it is now self-evident that Western farmers will sustain heavy losses through the effect of rusted crops.

Estimates of the loss through rust already run as high as 100,000,000 bushels of wheat; some estimates are even higher, and, of course, the actual loss will not be known until the harvest is completed. On many farms, even in municipalities, the crop will be ruined.

There is no desire to be alarmist in reviewing this situation. Notwithstanding the inroads by rust upon what a few weeks ago was one of the most promising crops in many years, the general agricultural situation is decidedly better than for some years past. Grass again covers great areas of western Canada which were previously desert-like appearance. Feed and fodder formerly lacking is now available, and the general situation reported to be good. But the big cash crop of the West, wheat, will be smaller and of decidedly less value than was hoped for and expected a few weeks ago.

The whole country must face this unfortunate fact, and do it to the best of its ability. No human agency can be held responsible for the losses sustained. It was beyond Governments, corporations, and individuals alike to prevent. All will be included in the losses sustained—Governments through loss of revenues and the necessity of providing assistance where it was not anticipated; individuals through loss of property, elevation, and other expenses; including farm laborers, through loss of employment; financial concerns to whom money advanced was owing but which cannot be paid as fully as was anticipated; farmers more especially because the return for their year's labor was swept away or very largely reduced. In a word, no existing political, financial, economic, or social system is responsible for the losses sustained by Nature. Nature and conditions deserved under its inescapable laws the sole blame.

But Nature is not always unkind. In the long run it always strikes a fair balance. Its laws operate not for one year, but through centuries of years. Man must not only recognize this truth, but govern himself accordingly. There is no greater law to be served by becoming dependent and dependent. Only then on one's own resources, and then is there face the situation and the problem presented. Losses to-day will be compensated for by gains to-morrow. That is a law of Nature. Therefore, the future should be faced with courage and determination. Life is a battle and must be fought. Man could not exist on "flowery beds of ease." If he is to succeed and reach the top of the ladder of life, he must exert himself and climb,时时 attacking and overcoming the difficulties of the way, the weeds that cling and clog his steps, removing weaknesses and strengthening the ladder. Climbing will become stronger; crouching at the foot of the ladder, waiting for somebody to carry him up, he will become flabby and weak and eventually succumb. Courage and determination, which will bring confidence, is essential to success in any walk of life. And in the long run Nature will not bar the way, rather it will be found helpful and co-operative.

### Wood Ready For Use

#### Germany Has Treatment To Season Trees While Growing

Telegraph poles, railway tie and other heavy wood necessities may be grown to order by a treatment which has just been discovered in Germany. Trees are made to season themselves so that when felled their wood is ready to use. A hole is bored in the trunk in the tree trunk, and a special solution containing arsenic and other salts is injected into the living tree. These chemicals enter the wood of the tree and gradually carried to the ends of the highest branches. The tree does not survive the treatment very long, but as it dies it becomes thoroughly saturated with preservative and can be used on railroads or for telegraphs and telephones without any of the usual treatment.

### Serves Double Purpose

#### Balloon Which Turns Into Parachute Selected For Mars Landing

A "parachute balloon," designed to change its form in the air and descend as a parachute, has made its first experimental flight from the field of the government dirigible factory to parts of America and the United States and Europe. This year there still the blankets, spreads and hooked rugs, but the rage is for homespun fabrics, sport jackets and coats are being made.

Much of the charm of the new fabrics is in their natural coloring and weave. Colors are from natural vegetable dyes, the habitant women making the fabrics from beginning to end.

Though women are doing most of the buying of habitant homespun, men are also using them for sportswear.

### Trying For New Record

#### Speed Of 300 M.P.H. Is Sir Malcolm Campbell's Aim

A circus performer, racing under the boiling sun on Utah's salt desert, planned as the greatest show in the history of automobile speed racing, is the September aim of Sir Malcolm Campbell and Captain George Eyston, the veteran driver.

The speed king announced their plans—so to sail together, Sir Malcolm to shoot again at his dream of 300 miles an hour in the veteran Bluebird; Eyston to tackle every mark between 200 and 24 hours.

With the exception of the Bonneville salt flats surface by his friend, John Cobb, who recently set 21 new records there, Campbell has not yet tested his Bluebird in the six-time record which he reached to the present land speed record of 276.816 on the sands of Daytona Beach last winter, finally will carry this time over a mile in 12 seconds, and then meet an end.

"I am sure I'll reach 300 this time," said Campbell. "I'll chuck racing and stick to business."

The 50-year-old Englishman has no challenge to-day for speed record, but his record has made a few alterations in the record book since his return from Florida.

Captain Eyston, who in the past nine years has set 200 records, more than any other living man, will attempt to break the record with his Bluebird. Eyston will drive a fast machine looking front-drive Juggernaut, powered with a 400-horsepower Rolls Royce aviation engine. It takes carry 46 gallons of gasoline, giving it a 500-mile range without stops. Eyston has an average 100 miles an hour or higher for 24 hours and is bringing Albatross along to drive.

**Fingerprints By Radio**

#### Experiments Have Shown Great Improvement In Results Obtained

Transmission of fingerprints by radio is the latest link between science and criminal detection—a link that is becoming stronger every day.

Experiments were begun several months ago. Although not yet regarded as an every day practical business, considerable improvement has recently been made in the results obtained.

At first the images were blurred, when sent from enlarged prints, but greater technical experience is gradually overcoming this drawback.

The time is very near when in urgent cases, when a criminal is believed to be at large, it will be possible to transmit fingerprints direct from the scene of the crime to Scotland Yard records, it was predicted.

As the technique of wired radio transmission improves, it will be possible to send life-size fingerprints photographically speed over any distance, police believe. Scotland Yard records are now being used to transmit fingerprints direct from the scene of the crime to Scotland Yard records, it was predicted.

cases the decreases were so arranged that the superannuation was not affected. I know a retired teacher, and 'there are probably many such, who receives about \$900 a year superannuation.

I mention this because half of this superannuation is paid by the government, and also a part of the \$2,000 salaries; and we country people help supply money for the government. Of course a part of the \$500 to \$700 salary the country teacher receives is paid by the government grant, but the difference between rural and urban salaries is too great. Do you wonder that many country teachers feel that their lot is not a happy one?

Prices cut to the quick

To-day most popular combine, the Oliver, Nichols and Shepard Combine, the combine with the regular large thresher cylinder, the "Man Behind the Gun" and steel winged beaters.

The demand for these combines proves their worth, and the price—why its astounding what these machines may be bought for. An inquiry will bring you all the details.

These combines may be had in 12 and 16 foot sizes with table extensions, and all have the recleaning equipment built into them.

We also have a few second hand binders

The foreman reported that the jury was unable to reach a verdict. The judge reproved them, saying that the case was a very clear one and remanded them to the jury room for further deliberation.

"And if you don't reach an agreement before evening in to you."

"May it please your honor," the foreman replied, "You had better make it eleven suppers and one bale of hay."

*And in the meantime—"Watch the Fords Go By."*

# BEER is BEST

Look at it from any angle—BEER is bottled health. The choicest "malting quality" Barley, which is reserved for brewing good Beer, is in itself a powerful source of energy—and because of the pleasant, bitter flavor imparted by the hop, Beer is a remarkable appetite stimulator.

No wonder then, that
